

I understand that the FCC is proposing changes in Low Power FM. I am concerned about this proposed change as it threatens the translator channel service that exists today. I daily enjoy listening to K-Love through their translator channel network. This is the only real opportunity that I have to listen to a radio station like this because of the size of the Greensboro market. If you make the proposed changes you will cause a great deal of disappointment within this and many other markets of this size around the country. Also, I travel a lot and through the translator channel network I am able to listen to K-Love in markets all over the country. If you make these changes you will be taking away this consistent opportunity for me. K-Love is like no other radio station I have ever listened to. The service they provide is second to none and I believe that it is in the public's best interest to retain the translator channel capabilities within the FM frequency system so that K-Love can maintain their broadcasting capabilities.
